EXPERIENCE

o Junior Web Developer

Feb - Nov 2021

- I worked on a school project, unpaid, creating a website to manage logistics in timetables, subjects and students for several teachers. My role was front-end based, working with languages such as HTML, CSS and JavaScript. I also had to make use of PHP when helping with the back-end part.

o Representative of the Church of Jesus Christ of Latter-day Saints

Curitiba | Brasil

Apr 2022 - May 2024

- I worked in a global non-profit organization that promotes and improves quality of life. I know how to work in a team with daily, weekly, monthly and annual goals, leading and managing projects of 26 people, and working in a high-demand environment.

o Technology Advisor

"Missão Brasil Curitiba" Office

Jun - Nov 2022

- I worked for almost a year providing technical support for computers, cell phones, and internet connections; in addition to providing advice on the effective use of technology, making presentations and classes for a group of 140 people, making them more efficient in their use of technology. I also learned to negotiate in the technology market by having to make purchases for the support of several computers and cell phones.

o Call Center Account Manager (ASHER|Haldast)

Sep - Nov 2024

- My role was based on advising people, for the Brazilian region, explaining about the financial market and giving advice on how to invest intelligently and safely. I performed that role in the Portuguese language. Clients had to deposit a certain amount of money to activate their account, which helped me develop sales skills, patience in guiding people remotely, and working under pressure.

EDUCATION

○ Secondary Education in Computer Technology (UTU)

Feb 2019 - Nov 2021

- I studied and finished my secondary education at UTU. I studied 3 years which were focused on computer science, especially web programming, but I also learned how to use basic tools like Word and Excel. I participated in many school projects, but the most important was the end of class project in which I applied knowledge from the 3 years: teamwork, task management and I led a part of the team which was focused on web design. We created a website to manage logistics in schedules, subjects and students for several teachers. My role was based on the front-end, working with languages like HTML, CSS and JavaScript. I also had to make use of PHP when helping with the back-end.

○ BYU-Pathway Worldwide

Sep 2024 - Feb 2025

- I studied for a period of three trimesters at BYU-Pathway Worldwide online with the participation of online classes in the English language once a week. The classes were student-led and I had the privilege of leading several of them. Each term had a specialized focus on skill areas which were: Life Skills, Professional Skills and University Skills. At BYU-Pathway I learned how to socialize with people in another language, patience in helping and being helped with homework and language, organizing teams for presentations, using Excel, PowerPoint and Canva.

○ ICUB | CELPE-BRAS

Aug - Oct 2024

- I studied at ICUB (Institute of Uruguayan-Brazilian Culture) for a period of 3 months in preparation for the CELPE-BRAS. The Certificado de Proficiência em Língua Portuguesa para Estrangeiros, better known as CELPE-Bras, is a Portuguese language certificate for foreigners, developed and granted by the Brazilian Ministry of Education. The exam can be taken not only in Brazil but also in several countries around the world thanks to the support of the Brazilian Ministry of Foreign Affairs. Internationally, it is accepted in companies and educational institutions as proof of proficiency in the Portuguese language and, in Brazil, many universities require it for admission to undergraduate and graduate programs.

○ Alianza | ECCE

May - Nov 2024

- I studied at the Alianza Institute for a period of six months in preparation for taking the ECCE (First Michigan English Test) which is a test that evaluates the four English proficiency skills: listening, reading, speaking and writing. The ECCE is aimed at the upper intermediate level (B2) of the Common European Framework of Reference for Languages.

○ BYU Idaho | Software Development

March - Currently 2025

- I am currently studying at BYU Idaho where my goal is to graduate from three years of three certificates: Web and Computer Programming (First Certificate), Web Development (Associate) and Software Development (Bachelor's). The Bachelor's degree in software development prepares students with the programming and development skills they need for a career in software development with special emphasis on web development. This degree is developed and awarded by BYU-Idaho, with support and resources coming from BYU-Pathway Worldwide.
